

# Medicaid-Covered, Part D-Excluded Drug List

Last updated 3/1/09

IMPORTANT: This list is sometimes called a "wrap around" formulary. It is for Part D-eligible PrimeWest Health members only. Your Medical Assistance prescription benefit covers certain items, which are excluded from traditional Medicare Part D coverage. The main classes of added coverage are benzodiazepines, over-the-counter items, cough and cold preparations, barbiturates, and some vitamins. Covered items are subject to change without warning. You may request coverage for drugs not listed in these therapeutic classes by using the formulary exception process. All final coverage determinations are made by PrimeWest Health.

## Barbiturate and barbiturate combinations

	*GPI #
butalbital-acetaminophen capsule	N/A
butalbital-acetaminophen tablet	N/A
butalbital-acetaminophen-caffeine capsule	N/A
