PrimeWest Health is a County-Based Purchasing (CBP) health plan. This means we are allowed to purchase health care services through Minnesota Health Care Programs (MHCP) for eligible residents of the counties we serve. The governing body of PrimeWest Health is called the Joint Powers Board (JPB). The JPB includes two county commissioners (one voting and one alternate) from each PrimeWest Health county.

PrimeWest Health provides health coverage under contracts with the Minnesota Department of Human Services (DHS) and the federal Centers for Medicare & Medicaid Services (CMS). The health coverage programs we offer are as follows:

- **Prepaid Medical Assistance Program (PMAP)**
  - For children under age 21, parents or relative caretakers of dependent children, and pregnant women who have Medical Assistance

- **Prepaid General Assistance Medical Care (PGAMC)**
  - For adults ages 21 – 64 without children (effective March 1, 2010, PrimeWest Health no longer provides coverage under this program)

- **MinnesotaCare**
  - For adults without children, parents or relative caretakers of dependent children, and children who are eligible for the State MinnesotaCare program. Members pay a monthly premium to the State.

- **Minnesota Senior Care Plus (MSC+)**
  - For people age 65 or over

- **Prime Health Complete (SNBC)**
  - For people who have a certified disability, are ages 18 – 64, and do not have Medicare (a Special Needs BasicCare [SNBC] program)

- **PrimeWest Senior Health Complete (HMO SNP)**
  - For people age 65 or over who have Medicare (a Minnesota Senior Health Options [MSHO] program)

- **Prime Health Complete (HMO SNP)**
  - For people who have a certified disability, are ages 18 – 64, and have Medicare (a Special Needs BasicCare [SNBC] program)

**GROWTH**

In 2010, PrimeWest Health marked its seventh year of operations. In this time, we have achieved both growth and success. In July 2003, PrimeWest Health began serving members in the PMAP, PGAMC, and MSC+ programs in 10 counties. These counties were Big Stone, Douglas, Grant, McLeod, Meeker, Pipestone, Pope, Renville, Stevens, and Traverse. We added MinnesotaCare and MSHO in 2005 and SNBC in 2008. (In 2009, PrimeWest Health’s names for MSHO and SNBC changed to PrimeWest Senior Health Complete and Prime Health Complete, respectively.) In
March 2008, we expanded and began serving PMAP, PGAMC, MSC+, and MinnesotaCare members in Beltrami, Clearwater, and Hubbard counties. We began offering PrimeWest Senior Health Complete and Prime Health Complete in these counties in 2010. The PGAMC program was discontinued by the State as of April 2010. The chart below shows PrimeWest Health’s growth since 2003 and enrollment at the end of 2010. Note, because membership varies each month, the chart reflects the average number of members each year in our MHCP.

**ACCESS**

PrimeWest Health has more than 6,700 providers and over 1,750 facilities under contract to serve our members. This large provider network ensures our members have optimal access to health care services and a choice of health care providers. The PrimeWest Health provider network includes nearly every health care provider of covered services in and around our current 13 counties. This includes medical, behavioral, human/social/family service, and allied health care providers. Our network also includes a full range of specialists and facilities in all metropolitan areas in Minnesota and eastern North Dakota and South Dakota.

Over the past several years, PrimeWest Health has worked hard to improve access to dental care for our members. Our dental provider network has grown from three dental providers in 2003 to more than 65 today. PrimeWest Health has also helped fund new dental clinics in Alexandria and Bemidji. These clinics primarily serve MHCP members. As a result, access to dental care has steadily increased for PrimeWest Health members. This is shown in the graph below. Due to legislative changes, dental benefits for adults were reduced in 2010 resulting in a slight decrease in unique members served, visits, and services, but PrimeWest Health continues to encourage the use of covered preventive and diagnostic services.

**Quality Initiatives**

PrimeWest Health is here to meet the needs of our members and health care partners. We strive to meet the highest quality and safety standards. To reach this goal, we follow standards developed by the National Committee for Quality Assurance (NCQA). NCQA requires us to tell our members and health care providers each year about our quality assurance (QA) initiatives that we are working on for 2011.

**Quality Objectives**

- To improve the health status of PrimeWest Health members
- To ensure access to high quality and safe health care services in the PrimeWest Health service area
Quality Plan and Work Plan
PrimeWest Health has a Quality Plan to help us meet our objectives. We also have an annual Work Plan to help us carry out each year’s quality improvement activities. These plans are designed by the Quality and Care Coordination Committee (QCCC). They are approved by the JPB. The activities focus on improving and building on already-existing best practices. Some of the activities included in the Work Plan are as follows:

• Performance Improvement Projects (PIPs) – projects that focus on improving member outcomes for a specific health concern
• Focus studies
• Member and Provider Surveys

Quality Improvement Activities
Quality improvement activities aim to improve any of the following:

• Clinical components
• Organizational components – aspects of PrimeWest Health that affect accessibility, availability, comprehensiveness, and continuity of health care
• Member components – members’ perceptions about the quality of PrimeWest Health’s services

PrimeWest Health staff members who specialize in each area are in charge of the activity.

PIPs
Current projects include:

• HPV Vaccination – Promotes the HPV (human papillomavirus) vaccine for members 11 and 12 years old to protect against cervical cancer; started January 1, 2008
• Aspirin – Asks members to talk to their health care providers about using aspirin therapy to reduce the risk of a heart attack or stroke; started January 1, 2008
• Preventive Care – Promotes preventive visits to a primary care provider for members newly enrolled in PrimeWest Health; started January 1, 2009
• Blood Pressure Control for Members with Diabetes – Designed to increase the number of members with diabetes who achieve a blood pressure goal of less than 140/90 mm Hg; started January 1, 2010
• Post-Discharge Member Follow-Up – Designed to increase timely coordination and information sharing with the “focus” hospitals in our network. The purpose of this is to improve the outcomes of discharge planning for members and to reduce readmissions; started February 2011
• Cholesterol Screening among Members with Diabetes – Designed to increase the number of members with diabetes who receive a Low-Density Lipoprotein Cholesterol (LDL-C) screening annually; started February 2011

Focus Studies

• Hospital Admissions Notification
• Physical Therapy
• Formulary Changes and Potentially Inappropriate Medications

Surveys

• Member Satisfaction – The Consumer Assessment of Healthcare Providers and Systems (CAHPS)
• Medicare Health Outcomes Survey (HOS-M)
• Provider Satisfaction and Availability
• County Case Manager Satisfaction Surveys
• Disease Management Provider and Member Satisfaction Surveys

Working Together
PrimeWest Health works with our county partners to assess member health care needs. We work together to develop goals for improvement of the overall health of our members and communities. For example:

• In 2010, PrimeWest Health continued to work with Public Health and Human Services departments in our 13 counties. All of PrimeWest Health’s MSC+’s, PrimeWest Senior Health Complete, and Prime Health Complete members have a county case manager to help them meet their health care goals.
• We worked to increase immunization rates, including routine childhood immunizations and seasonal influenza vaccine.
• We worked with our county partners to provide education about obesity prevention. We also worked to provide education about tobacco cessation programs and the prevention of tobacco use.
• We worked to increase the rate of blood lead testing for 1- and 2-year-olds.
